

THOMAS ADAIKALA RAJ

Web Developer | Python Developer

+91 9790198297 | statrajthomas@gmail.com | Tamil Nadu, India | github.com/thomasraj2004

PROFESSIONAL SUMMARY

Motivated and detail-oriented Web and Python Developer with hands-on experience building functional web applications and Python-based tools. Proficient in HTML5, CSS3, JavaScript, and Python, with practical exposure to Django, Firebase, and OpenCV. Demonstrated ability to develop end-to-end projects including a real-time driver monitoring system, a student marketplace platform, and a secure password manager. Adept at picking up new technologies quickly, collaborating effectively in team environments, and delivering clean, maintainable code. Actively seeking an internship or entry-level developer opportunity to contribute skills and grow within a professional setting.

TECHNICAL SKILLS

Web Development: HTML5, CSS3, JavaScript

Backend / Database: Django, SQLite, Firebase

Dev Tools: Git, GitHub, VS Code

Programming: Python

Libraries / Frameworks: OpenCV, Tkinter, Machine Learning (Basic)

Creative Tools: Adobe Photoshop, Lightroom, Premiere Pro, Canva

PROJECTS

Real-Time Driver Monitoring System

Technologies: Python, OpenCV, Machine Learning

Developed a real-time monitoring system that detects driver drowsiness and distraction using computer vision. Implemented facial landmark detection and eye-aspect-ratio analysis to trigger safety alerts, enhancing road safety through automated behavioral analysis.

Student Marketplace Platform (Ongoing)

Technologies: Django, Python, SQLite

Building a web-based marketplace enabling students to buy, sell, and exchange academic resources within a college ecosystem. Features include user authentication, product listings, and a responsive Django-backed interface with SQLite storage.

Secure Password Manager

Technologies: Python, Tkinter

Designed a desktop password manager with an intuitive GUI that securely stores, retrieves, and manages credentials using encryption-based storage within a lightweight, portable Python application.

School Management System

Technologies: HTML, CSS, JavaScript

Created a front-end school management interface for student records, attendance, and administration tasks, focusing on clean UI/UX principles and responsive layout using pure HTML, CSS, and vanilla JavaScript.

EXPERIENCE

Freelance Web Developer

2024 – Present

Developed and delivered custom web solutions including landing pages and small-business websites. Managed the full project lifecycle from requirement gathering through deployment.

Python Developer – Personal Projects

2023 – Present

Built self-initiated Python applications spanning GUI tools, automation scripts, and computer vision projects, strengthening core programming fundamentals and problem-solving skills.

Freelance Photographer & Creative Editor

2022 – Present

Handled end-to-end photography and post-production editing using Adobe Photoshop, Lightroom, and Premiere Pro, developing strong visual communication and attention to detail.

EDUCATION

Master of Computer Applications (MCA)

Completed

Bachelor of Science in Computer Science (B.Sc. Computer Science)

Completed
